a. White revolution is meant for increase in milk production.

- b. Blue revolution is meant for increase in fish production.
- c. Increasing food production without compromising with environment quality is known as sustainable agriculture.
- d. None of them.
- 53. Weeds affect the crop plants by
  - a. Killing the plants in the field before they grow.
  - b. Dominating the plants to grow.
  - c. Competing for various resources of crops causing low availability of nutrients.
  - d. All of the above.
- 54. Choose the correct answer -
  - I. Hybridisation means crossing between genetically dissimilar plants.
  - II. Cross between two varieties is known as inter specific hybridisation.
  - III. Introducing genes of desired characters into a plant gives genetically modified crop.
  - IV. Cross between plants of two species known as inter generic hybridisation.
    - a. I and iii
- b. ii and iv
- c. ii and iii
- d. iii and iv

- 55. Find out the correct statement about the manure.
  - a. Manure contains large quantities of organic matter and quantities of nutrients.
  - b. It helps out in graining out of excess of water from clayey soil.
  - c. It increases the water holding capacity of soil.
  - d. Its excessive use pollutes environment because it is made of animal excretory waste.
    - i. a, b and c
- ii. a and c
- iii. b and c
- iv. c and d
