

CLASS X GUESS PAPER SCIENCE

- 1.why is DNA copying essential for reproduction?
- 2.what is the role of a catalyst in a chemical reaction?
- 3.which class of compounds gives a positive fehling's test?
Ans:aldehydes
- 4.what is meant by 1 volt?
- 5.write the chemical name and formula for bleaching powder?
- 6.What is meant by dehydrating agent?
- 7.state ohm's law.draw a schematic diagram of the circuit for studying ohm's law?
- 8.state one limitation for the usage of solar energy?
- 9.what is a gene and where is it located?
- 10.explain double fertilization in plants?
- 11.What is meant by magnetic field?
- 12.why chlorophyll green in colour?
- 13.give two methods to prevent rusting?

14.state the functions of gastric glands?

15.explain why stars twinkle?
